INTRODUCTION

This guide will teach you how to take out and replace your laptop's battery. It is a simple replacement that requires no internal disassembly.

Step 1 — Battery

 Before beginning, make sure the laptop is properly shut down and charger is detached.

- On the bottom of the laptop, locate the battery release slider and slide it to the left to release the battery.

Step 2

- The battery is unlocked, and can now be pulled out of the laptop.

To reassemble your device, follow these instructions in reverse order.
